**1. Chair Report**

**A. Tech Review Updates**

- Physics department would like to add a pre-engineering major at Grossmont; pre-major which would put together the courses that are required in order to

follow that pathway.

- Only for courses we offer at Grossmont; similar to what we did in biological sciences with their pre-allied health major
- The pre-major helps students to do all of the lower division prep required for transfer; flexibility in general studies and university studies.
- Biology would like to merge their 141 and 141L into one new course; need agreement with CC Alignment. Will wait to update when CCN is done. Articulation timeline is in 2030 for a new course to include UC transferability, CalGETC approval, CID, etc.
- Collecting more information for a new grading option for non-credit classes (mention of satisfactory progress) for the MATH course and what the problem is they are trying to solve.

**B. ASCCC Curriculum Area Meeting**

- **Notes**
- **Cuyamaca College Form**

**C. Alignment Policies and Procedures Committee**

- The call went out to Senate and there is one volunteer so far for the committee, Jeff Wahler.

**D. Other**

**2. Articulation Report**

**A. Respiratory BS**

- Completed the feasibility process and the Respiratory Therapy Baccalaureate application will be submitted in January.

**B. CSIS BS**

- On the next level of approval; their application passed. Looking at local duplication; there are some new policies coming through the Chancellor's office regarding baccalaureates and how they will determine how/if to add these.

**C. Feasibility Task Group – Welding**

- Received an executive summary from career and technical education; looking into hiring a discipline expert.
- Finding which type of welding jobs are available, which industry partners, etc for Feasability group.

**D. Other**

- The committee will continue reviewing remaining proposals as time allows.
- Items not discussed will roll over to the next meeting.
