This meeting of the Accreditation Steering Committee was convened to continue review of revisions in the self-study document requested by the district chancellor and his staff at a meeting of May 22. The primary focus of the meeting was on the content of Standard IV. The editors were directed to revise the self-study in accord with the Steering Committee discussion and present it to district officials. The final document needs to be approved at the Governing Board meeting in July.

The Steering Committee decided that no further meetings should be called. Any substantive changes in Standard IV will be emailed to the Steering Committee membership for review and agreement prior to their adoption.
