Student Success Stories

“My name is Austin, I’m a Computer Programming major at Grossmont College. With the help of Career Services, I got a job as a computer science tutor for the college. Before this I was unsure of where to even start with looking for a job. I tried looking on indeed and other websites but got overwhelmed by the amount of options and whether or not I was qualified or what I wanted to do. They helped me with creating a resume and preparing for interviews as well as how to look for positions and what to check for in them. The Career Services office is a fantastic resource for anyone who has any questions at all when it comes to the employment process and I highly recommend those that are seeking employment to check out their services.”

-Austin Thomas
Grossmont College Student

“Hello, I am Rita Yousif and I am passionate about engineering and I want to pursue a career to become a software engineer. I was very nervous in taking the position of a tutor in the Computer Science department at Grossmont College. However, because of the enormous assistance that I got from the Job Placement Specialist, Sonia Yaddgo, I was able to gain the confidence and earn the role. My life changed because of the huge support that I got from the entire team at the Career Services office because with their help and encouragement, I am able to assist people from all around the world with computer tutoring. My goals for the future is to work with people to guide them with their questions in order for them to be confident with computers. Also, I want to increase my knowledge of computers in which I am striving to get a doctorates degree in Computer Science in the future. I highly suggest that anyone who is interested in getting life-changing opportunities to go visit the Career Services office and talk to Renee, the Career Services Supervisor who was very supportive and assisted me regarding internships, career path, job preparation and much more that will open so many doors in the future for them.”
