Kenneth Stevens

Currently Teaching

- CSIS 296 – Intro to C++
- CSIS 297 – Intermediate C++

Kenneth Stevens has been an adjunct professor at Grossmont College since 2017. Starting out by teaching JavaScript programming and then moving to C++ programming. Teaching has always been his passion and when he was given the opportunity, he did not hesitate. He is committed to bringing in real-world experience into his lectures and class projects. He works to give his students the tools they will need in their careers.

He holds two master's degrees, one in Data Management and the other in Business Administration.

He brings over 20 years of experience to the classroom, beginning with web design and then application development. He is currently a project manager with the County of San Diego focusing on the County's financial systems.

He is dedicated to the success of every student who comes into his classroom.
