

Editing your Canvas Profile

You, your instructor, and your classmates will use Canvas to look at class materials. You already know what Canvas is from your first day video tour of the class.

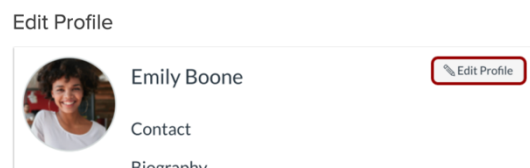

To help your instructor and your classmates get to know you, you can set up your Canvas user profile. Here are the steps you need to follow.

1. Open Canvas and log in.
2. Open your profile (see numbers 1 and 2 in the picture).

Open Profile

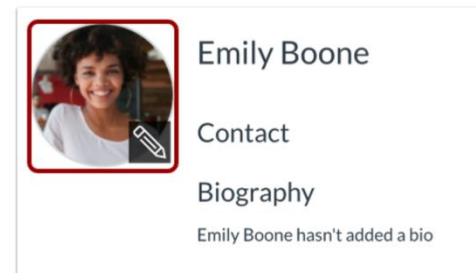

3. Click on the “Edit Profile” button.

4. Click on the pencil button to add or change your picture.

Edit Profile Picture

5. The last step is to add information about you in the “Biography” section. You can write two sentences or phrases. For example, I could say: *“My name is Natalia Aylett. I am from Uruguay. I love the English language.”*
