

Factoring Review Workshops

Thursday, August 26, 2:30-4PM

Friday, August 27, 10AM-11:30AM

Offered Remotely

<https://cccconfer.zoom.us/j/95853942897>

Has it been a while since you factored algebraic expressions like $x^3 + 27$ or $4x^2 + 5x + 6$ and the class you are in now requires you to remember how to factor them?

These workshops are for you!

These workshops will include a review of GCF, grouping, trinomials, squares, and cubes. They will also include a review of solving quadratic equations using factoring.

Each workshop will be led by Cierra Rawlings, a full-time Grossmont math faculty member.
